PROFESSIONAL SUMMARY

Passionate Computer Science student specializing in Aviation Information Systems with hands-on experience as an IT Specialist. Experienced in Front-End Development using React, JavaScript, Firebase, and Tailwind CSS. Strong background in IT Support, troubleshooting, networking, responsive UI development, and scalable management systems. Passionate about clean code and solving real-world problems.

WORK EXPERIENCE

IT Specialist — Glory Club

Jan 2026 – Present

Provided technical support and hardware/software troubleshooting for all club systems.

Managed network maintenance and system upkeep to ensure operational continuity.

Handled printer and computer configuration across departments.

Supported IT operations and delivered reliable help desk assistance to staff.

PROJECT: Glory Sales CRM

Progressive Web Application (PWA)

Built a full-featured CRM as a Progressive Web App with role-based authentication.

Implemented lead management and customer management modules.

Integrated Firebase backend with real-time Firestore database.

Designed a fully responsive dashboard with Tailwind CSS and React.js.

PROJECT: Glory Club Management System

Club Operations Platform

Developed a comprehensive club management system covering membership and subscriptions.

Built sports management, reporting, and user permissions modules.

Integrated Firebase for real-time data synchronization and secure authentication.

Delivered a scalable, role-based platform for club administrators.

PROJECT: Personal Portfolio Website

Personal Branding & Showcase

Designed and developed a modern portfolio with dark theme and smooth animations.

Implemented responsive design principles for optimal viewing across all devices.

Added CV download functionality and a working contact form.

Showcases projects, skills, and professional profile. Live: marwan-portfolio-delta.vercel.app
